

Phone upload CSV file API

Questions: **954.903.0834**

This simple csv upload may be used by your IT DEPARTMENT to programmatically keep your contacts current with a super simple POST to the Robotalker's website.

You can do the following:

Remove all contact from an existing group in your portal without user intervention.
Quickly replace all contacts with current contacts.

1) Get your user key from inside the portal:

Locate your key here:

The screenshot shows the 'Account Information' page in the RoboTalker portal. On the left is a navigation menu with options like 'Log out', 'Phone Numbers', 'Recordings', 'Schedule Jobs', 'Job History', 'Statistics', 'Auto-Responder', 'Buy More Units', and 'User Settings'. The main content area displays a table of account information:

| Item | Value |
|----------|---|
| UserId | 8 |
| Z-Key | C953881BC38662FE94 C1CF90C538979AE20AC51689 |
| Z-Token | 90C57789818820EE |
| z-userId | 8 |
| Zip Code | 33308 |

Below the table, it says 'Showing 21 to 25 of 25 entries' with 'Previous' and 'Next' buttons. At the bottom right, there is a button labeled 'Update Your Default Settings'.

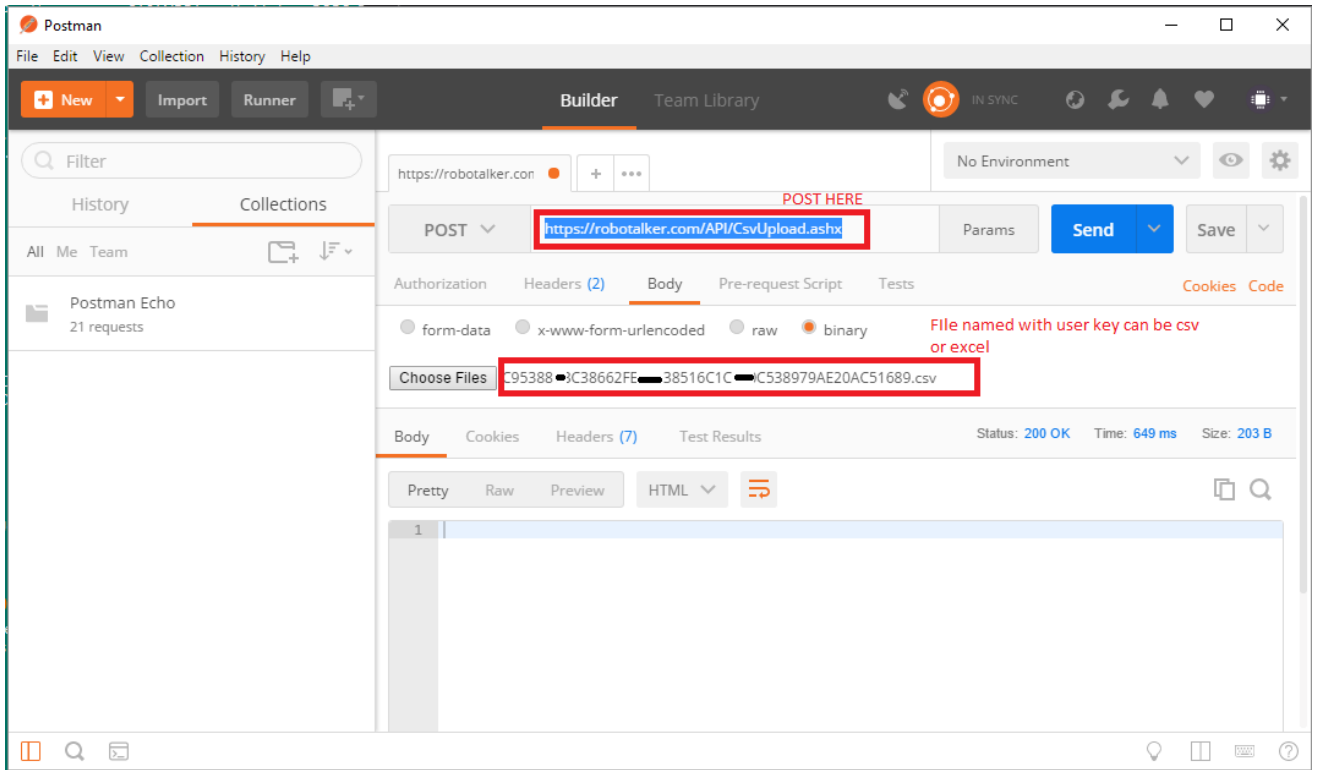

2) Make your CSV file the same format that is used for upload in the portal. You may download a template from inside the port of the simple three column sheet that contains:

Name, Phone, Group Name

Name of your CSV file that you want to upload using the KEY for the csv file name.

C3weywefwww8343vrvsv4539v.csv

3) POST this file to this URL <https://robotalker.com/API/CsvUpload.ashx> to REPLACE THE GROUP and erase all contacts with the same group name.

*Your IT department can use Postman as a tool for testing before creating the simple POST code internal to your system.
